

# RED LINE TWO-STROKE ALCOHOL OIL

IMAGE  
NOT  
AVAILABLE

- Mixes with alcohol and/or nitromethane for karting, model airplanes, etc.
- Excellent cleanliness, lubrication and scuff protection -- use at leaner ratios than with a gasoline two-stroke product
- For premix with E-85, popular with rotary road race applications

## PACKAGE SIZES:

40504 - Two-Cycle Alcohol Oil - quart

40505 - Two-Cycle Alcohol Oil- gallon

## ABOUT RED LINE TWO-STROKE OILS

- Contain ester base oils with the highest film strength and affinity for hot metal
- Increased power and excellent scuff protection
- Provides the lubricating qualities of castors, but with exceptional cleanliness
- Low carbon residue dramatically reduces plug fouling and smoke
- Compatible with reformulated fuels
- Each product works in both premix or injection systems
